CiRA Program-Specific Researcher, T-CiRA Hotta Project

Update (April 26, 2021): Contract period

July 15, 2020

Position	Program-Specific Researcher (Specially Contracted Limited-Term Faculty)
Number of position available	One
Work location	T-CiRA Hotta Project (In vivo Genome Editing Therapy Project) Center for iPS Cell Research and Application (CiRA), Shonan Branch 26-1, Muraoka-Higashi 2-chome. Fujisawa, Kanagawa, Postal code: 251-8555, Japan * 15-min Bus ride from JR Ofuna or Fujisawa station https://www.shonan-health-innovation-park.com/en/access/
Job description	With the Hotta Project in T-CiRA Program, we are conducting research and development of a novel genome editing therapy for Duchenne muscular dystrophy. So far, we have developed various gene delivery techniques, such as LNP, AAV and VLP, and demonstrated the efficacy and safety using patient' iPS cells and animal models [Ref: Gee P et al., Nat Commun, 2020 Morisaka H et al., Nat Commun, 2019 Li HL et al., Stem Cell Reports, 2015]. The T-CiRA project, which is a 10-year project started at the end of 2015 in collaboration with the CiRA and Takeda, will promote research and development for clinical application of innovative therapeutics based on groundbreaking basic research. In this unique industry-university collaborative project, we are conducting research aiming to develop a therapeutic method that has a scientific impact and a benefit to patients. "Act for the Promotion of Science, Technology, and Innovation" will be applied to this position. For details of T-CiRA and our research, please visit the sites below: https://www.takeda.com/what-we-do/t-cira/ https://www.takeda.com/what-we-do/t-cira/
Job requirements	 He/she has (or expects to have) a Ph.D. or equivalent professional achievements/capabilities in medicine, dentistry, pharmacology, science, or engineering. Enthusiastic about the research and development of muscle disease treatment methods using genome editing. Motivated to acquire and develop new experimental methods. Can work as a member of our team with researchers from academia, Takeda Pharmaceutical and related companies. [Desired capabilities] Research experiences in the research field of DDS and cellular entry. Research experiences in the research field of muscular dustrophy model animals.
Contract period	 Research experiences in the research field of muscular dystrophy model animals. Start day (negotiable) ~ March 31st, 2022 with a possibility of renewal until up to the end of the project.

	1
	When the contract term has expired, the employment contract terminates. Renewal of the contract at the expiration of a fixed-term employment contract is decided by comprehensive evaluation of your work performance, behavior, capabilities, etc. Working conditions may be changed at the renewal of contract. No matter how excellent your work performance, behavior, and capabilities have been, there are cases in which the contract is not renewed on account of unavoidable reasons, such as change of financial status, or loss of the job contents specified above due to reassignment of your lab's principal investigator or reorganizations.
