

Additional Processes in Ethical Review of Research Protocol Involving Human Subjects

(for the Departments which do not have the Medical Ethics Committee)

Additional Processes

Additional Processes

- ① Ethical Review Committee of the Department submit the research protocol involving human subjects to the Research Integrity Division before review.
- ② Research Integrity Division checks the submitted research protocol. If there is a possibility that the research protocol is subject to the “Ethical Guidelines for Medical and Biological Research Involving Human Subjects” (Human Guidelines), the protocol is submitted to the Human Guidelines Subcommittee (consisting of three chairpersons of the Ethics Committee of Graduate School and Faculty of Medicine, Institute for Life and Medical Sciences, and Center for iPS Cell Research and Application) under the Research Ethics and Safety Promotion Committee for comments.
- ③ Ethical Review Committee of the Department notifies the principal investigator that the research protocol is subject to the Human Guidelines and appropriate measures such as review by the Medical Ethics Committee are required.
